Figure 1. Inline tags

The screenshot shows the XTM Translator interface. At the top, there's a menu bar with 'File', 'Preview', 'Settings', 'Visual mode', 'Video preview', and 'Help'. Below the menu, there's a header bar with 'Translator', 'English (UK)', 'Polish', 'index.md', 'QA', 'Filter', and 'More'. The main area is a table with two columns: 'Source' and 'Target'. The table contains several rows of text, some of which are highlighted with red boxes. Red arrows point to specific elements: arrow 1 points to the 'Source' column, arrow 2 points to the 'Target' column, and arrow 3 points to the 'Inline tags' panel on the right. The 'Inline tags' panel shows a list of tags: (1) <emphsis prefix="..." suffix="...">...</emphsis>, (2) <link-text prefix="..." suffix="...">...</link-text>...<url prefix="..." suffix="...">...</url>, and (3) <new-line suffix="...">...</new-line>.
